Closing	16:00

NOTE: The workshop is held online. Our software can be downloaded from our homepage.

What We Stand For

We are convinced that laboratory informatics needs to be as easy to understand like your daily office routine.

Our workshop provide the necessary knowledge so that you are ready to perform your LIMS project with minimal effort and a maximum of success.

What We Offer

We combine precious knowledge from specialists in combination with outstanding software to show you in a practical way how things are done.

No matter whether you want to use our lims in the standard version or you require a high level of complexity, we show you a realistic approach to reach your goals.

Contact Us

In case of any question please do not hesitate to contact us. Our team is already waiting for you.
